Business report

Looking back on the Easy Smartphone Class... In the "Easy Smartphone Class" held in April 2025.

Various people, including those from the same household, learned how to use smartphones. From basic operations to registering SNS (LINE), Search for names, take photos, post photos, and more with touch and control. Even those who are unfamiliar with the language were able to enjoy learning. I would like to continue this learning opportunity.

The fourth and final seminar of "Writing My Life Notes" will be Chapter 4, "My Ending"

And when I lost my ability to make decisions, We discussed together issues such as inheritance. Thinking about "end-of-life planning" means "living vibrantly and happily in the present" The instructor also said at the end that this may lead to was. The important thing is to "think about and know what you need" "Education (I have somewhere to go today), Culture (I have something to do today)" "It's important to act while you're healthy, rather than realizing it only after you've had a problem. I realized that this is necessary.

As we get older, nutrition, physical activity, and social participation are important. In particular, participating in society allows you to connect with others and feel happy. It is important to make friends and live a fulfilling life. Isn't it?

At the Hatsukaichi Nagaseika Association, we practice the following: Don't be alone. Don't let others be alone. Have fun. Spend time with a smile!

for example... These are the activities we are engaged in-

- ÿ Day trips ÿ Neighborhood cleanups and Katsura Park cleanups ÿ Cultural classes such as health exercises, rakugo, and music appreciation

The white lines in the parking lot at the Civic Center are faint. It was starting to fade, so I had to repaint it white.
